

Name _____

Inventors

People of many cultural, racial, and ethnic backgrounds invented things needed by others. Often, one person would develop something very exciting. In later years, another person would add something else to the original item and end up improving upon the original invention.

Read the information below. Place the names of the correct scientists, or contributors, under their invention.

Lewis Latimer....His invention helped lights to burn longer.

Thomas Edison....He made it possible to read at night.

Granville T. Woods...He made long-distance telephone calls possible.

Alexander Graham Bell...His invention helped people talk to others without visiting in person.
